Summary.

Detail-oriented Computer Science Engineering student with a strong foundation in data analytics, machine learning, and performance optimization. Adept at analyzing complex datasets using Python, SQL, and Scikit-learn to generate insights that inform strategy and enhance business performance. Skilled in building interactive dashboards and visualization systems (Streamlit- and Tableau-style) to communicate findings effectively to diverse stakeholders. Experienced in developing AI-driven solutions such as anomaly detection and hybrid recommendation systems that bridge technical precision with business impact. Driven by curiosity and analytical rigor, I aim to contribute to Mastercard's Advisors & Consulting Services team by transforming data into actionable intelligence that fuels smarter decisions, optimized performance, and measurable growth.

Education

Amrita Vishwa Vidyapeetham, Amritapuri	2022-present
B.Tech · Computer Science and Engineering	CGPA - 7.98/10
Christ Central School	2022
Class XII - CBSE · PCMB · TIRUVALLA	Percentage - 85.2%
Chinmaya Vidyalaya	2020
Class X - CBSE · CHENGANNUR	Percentage - 95.4%

Experience

Infospica	Aug 2024 - Aug 2024
Web Developer · Web Developement Intern · Internship	Trivandrum
Developed and optimized networked web applications with a focus on performance and security.	
Gained expertise in client-server communication, data transmission protocols, and backend optimization.	
Implemented secure authentication mechanisms to prevent unauthorized access.	

Hospital Booking Website (WordPress) | Link

Developed a user-friendly website for Asclepius Hospital to facilitate appointment booking, access to medical services, and detailed information about the hospital's offerings.

The platform reflects the hospital's dedication to providing quality healthcare. Implemented a secure patient portal for accessing medical records and consultation history

Projects

AutoPulse-Intelligent Vehicle Lifecycle & Anomaly Management System	Aug 2026 - Present
· Java, Spring Boot, React.js, PostgreSQL, Flask, Isolation Forest, Docker	
Built a full-stack web platform (React + Spring Boot + PostgreSQL) with a Python ML engine for anomaly detection using Isolation Forest/Autoencoders.	
Developed dashboards for anomaly tracking and integrated simulated vehicle sensor input for real-time performance monitoring.	
Bias-Aware & Explainable Fake News Detection System	Apr 2025 - June 2025
· RoBERTa , SHAP, LIME	
Fine-tuned RoBERTa for text classification, integrating explainability tools (SHAP, LIME) and bias testing for fair predictions.	
Developed a Streamlit-based UI with interpretability features, clickbait detection, and cross-political bias evaluation.	
Movie Recommendation System	June 2023 - Aug 2023
· PostgreSQL, SQL, Python, Pandas, Streamlit, Matplotlib, Seaborn, Git	
Designed and implemented a normalized relational database managing users, courses, instructors, and payments, creating ER diagrams, enforcing constraints, and optimizing schema for scalability and data integrity.	
Developed advanced SQL queries-including joins, aggregates, subqueries, and date functions to extract actionable insights, simulate end-to-end data flows, and support data-driven decision-making.	

Certifications

Cyber Security and Ethical Hacking: Coincent and Microsoft (2023)
Evolumin Hackathon : ACMStudent ChapterAmritapuri(2024)
CompTIA Network+: Network Services & Data Center Architectures: Infosys Springboard (2025)
Problem Solving (Intermediate) : HackerRank(2025)

Volunteering

Student Social Responsibility (SSR) :Conducted a workshop on WebDevelopment and Career Guidance for Grade 11 students at Lightland Higher Secondary School, Oachira. Conducted a hands-on workshop covering HTML, CSS, and career guidance for higher secondary students.

Technical & Interpersonal Skills

Programming & Scripting : Python, C, C++, Java(basics),Bash Scripting(with experience in Unix/Linux environments)

Database : PostgreSQL,MySQL

Cybersecurity & Ethical Hacking:Encryption(OpenSSL),Basic Vulnerability Analysis, Secure Authentication

Visualization: Streamlit, Matplotlib, Seaborn

Cloud & Tools: AWS, Docker, OpenSSL

Leadership & Involvement: Leadership,Team Management, Event Coordination

Languages:English , Malayalam, Hindi: Fluent to Read, Write, and Speak
